Welcome to PDI International

About Us

PDI International is dedicated to leading the fight against preventable infections in healthcare, hospitality and our communities.

Through our dedication to research and development, sustainable innovation and industry-leading partnerships, we continue to build our portfolio of products and solutions, and help our customers by providing continual support, resources & expertise to help make a difference in the world.

Our Mission

Be The Difference®

We are driven by a higher purpose to lead the fight against preventable infections and help save lives.

Because of what we do every day, someone's Mother, Brother, Father, Son, Sister, Aunt, Uncle, Child or Lover won't get sick, die or suffer.

Our Vision

To be a global infection prevention innovative leader and trusted advisor to our customers internationally.

Together, we will make all the difference in the world.

**At PDI International,
we believe that every
single one of us can
Be The Difference®**

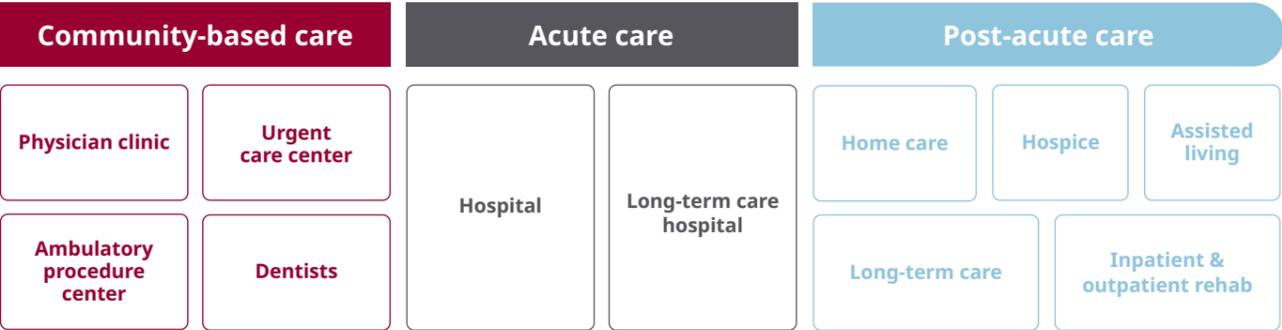

Dedicated to Be The Difference®

At PDI International we are constantly exchanging expertise, capabilities, & innovations with our colleagues at PDI North America, yet the solutions provided by PDI International are designed to respond to the specific needs and regulatory requirements in each unique environment where we work. It is only by responding to those specific needs we can truly make a difference, and impact lives within each of those markets.

**Infection risks are everywhere.
So are we.**

Our solutions are designed to reduce preventable infections and help save lives across the Healthcare continuum.

History of innovation

Since 1977, PDI has spearheaded the development of many of the industry's most important infection prevention solutions.

- 1962**

"Colonel" Harlen Sanders joins the mission, bringing Julius' world's first pre-moistened wipes to KFC.
- 1977**

PDI established to impact more lives with a focus on healthcare.
- 1988**

Sani-Cloth® are the world's first registered hard surface disinfectant wipes with range extension over the next 3 decades.
- 2004**

Hygea range is launched providing personal cleaning and hygiene solutions to patients.
- 2012**

Launch of Prevantics® portfolio providing innovative skin antiseptics & device disinfection solutions.
- 2013**

Pluswipes acquisition expands PDI's R&D capabilities & expertise with its well-established global contract manufacturing business.
- 2018**

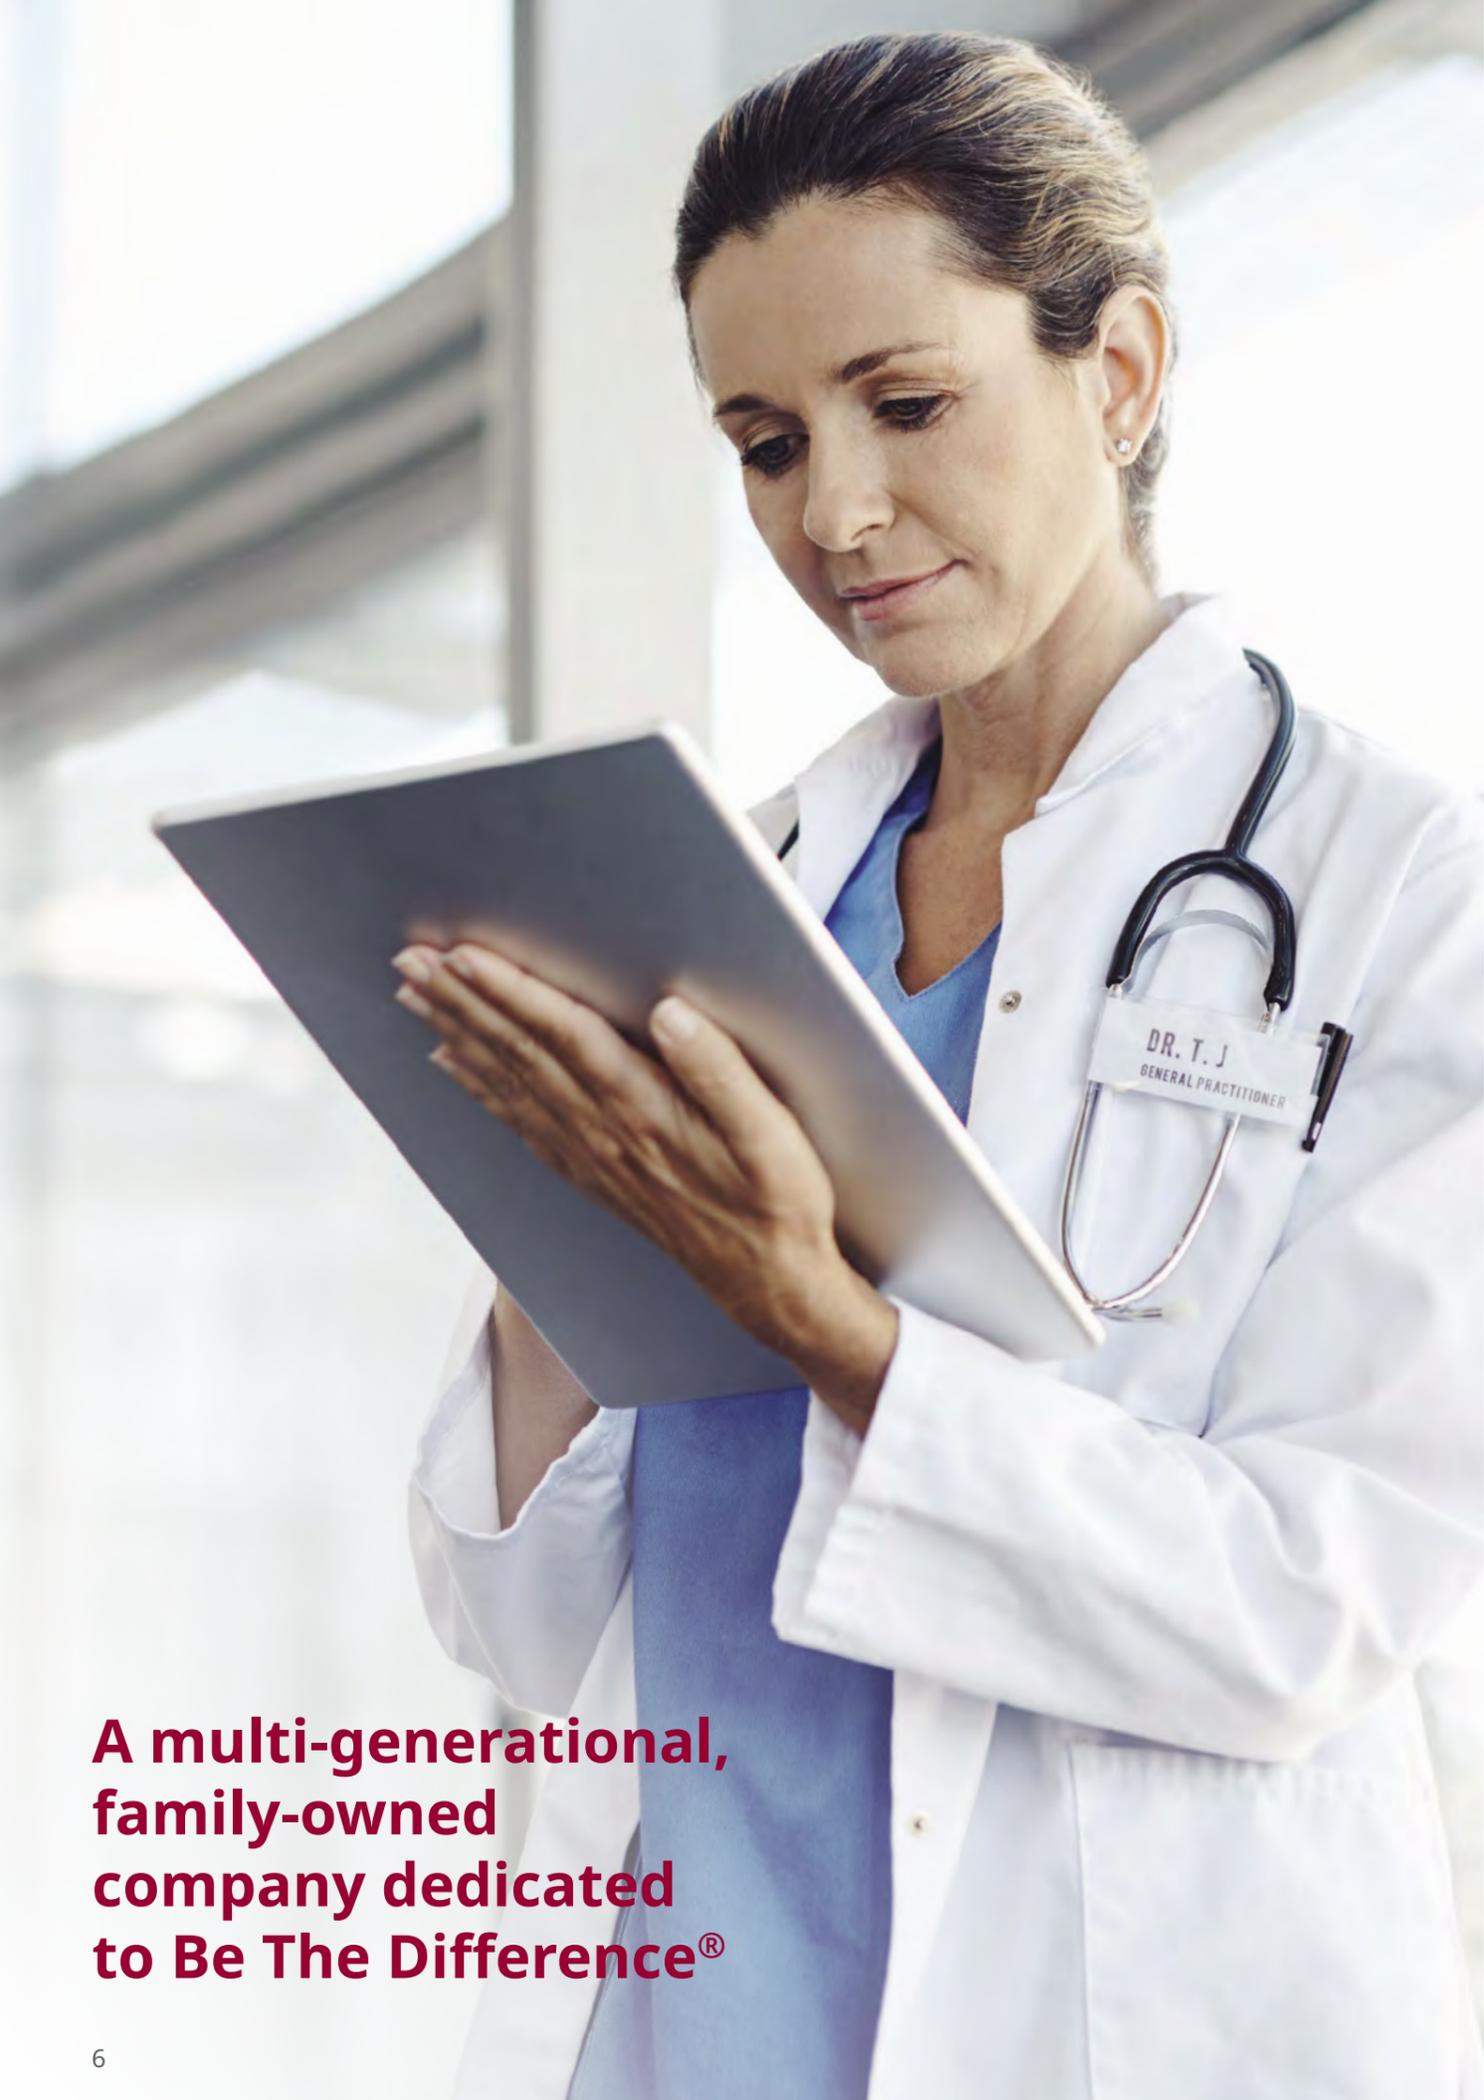

NEX Medical acquisition extends PDI Healthcare's Interventional care portfolio with unique solutions to address surgical site infections (SSIs).
- 2020**

PDI International is established leveraging the people, technology & processes across multiple market-leading companies to realise its ambition.

Through our dedication to research and development and industry-leading partnerships, we continue to build our portfolio of products, clinical support and educational resources to fight preventable infections and help save lives.

That's our commitment to the people who count on PDI. Every day.

+ PDI International has a rich history and an even brighter future.

**A multi-generational,
family-owned
company dedicated
to Be The Difference®**

Why partner with PDI International

PDI International is leading the fight against preventable infections in healthcare. We are driven by a higher purpose to help you save lives.

Focused Experts

With a 40-year heritage focused purely on helping to fight preventable infections, we continue to leverage the concentrated expertise we've gained to create new and innovative solutions that enable healthcare facilities to save lives. Infection prevention is the only thing we do.

Evidence Based

PDI International empowers healthcare facilities with the confidence of clinical and economic evidence that proves when our products are used in the right way every time, they help save lives, and reduce both length of stays and associated costs.

Invested Champions

Together, we form a community united in the pursuit of better ways to prevent infection and improve patient health. Our layered approach to infection prevention is our investment in this community, as well as in each of you, your healthcare institutions and your patients.

Trusted Advisor

Since our founding, PDI has been synonymous with infection prevention. Each year, over one-quarter of a billion people are helped by PDI products and continued innovations. As such, we work every day to earn the privilege to be a trusted advisor to our customers. Together, we are driven by a higher purpose to lead the fight against preventable infections.

Layered Approach to Infection Prevention

No single approach can fully eliminate the risk of healthcare-associated infections (HAIs). That's why healthcare facilities need multiple layers of defense to truly combat infection.

Our layered, consultative approach is designed to help you go beyond just product selection to focus on your overall infection prevention strategy using the following steps:

Layer One – Assessment

Through an in-depth assessment and working in partnership, we aim to understand your clinical setting requirements and challenges before putting forward the most suitable solution which will support you in achieving your specific infection prevention objectives.

Contact us to find out how we can assess your facility together.

Layer Two – Product Selection

Based on the outcome of the assessment, we will advise you which products across our three ranges will best overcome your challenges and support your goals.

Products kill bugs, but people prevent infections™

Environment of Care

From daily, facility-wide use to outbreak situations, PDI's complete line of disinfectants and cleaners address your environment of care needs.

Layer 3 – Training

We provide best practices in infection prevention through digital and in-situ training programmes, product training videos, and an extensive resource library.

Point-of-care Assessments

We can help you identify the most suitable placement for your products.

Staff Training

We provide videos, infographics, and product signage to help support your infection prevention initiatives.

Continuing Education

Stay on top of infection prevention best practices, trends & hot topics with our free online courses & earn training points.

Contact us to find out more about our assessments, training & educational courses.

Layer 4 – Support

We are invested in your facility and the wellness of your community. That is why our ongoing support and continual interaction with your staff is so important to us. We provide:

- Systemic measurement at regular intervals via audits
- Periodic results via product evaluations & feedback with team members
- Information sharing to ensure optimal infection prevention and control best practices
- Updates on the latest product enhancements and innovations
- Notifications when required
- Free access to accredited educational courses

+ No matter who you are or what you do, we all play a critical role in the fight against preventable infections.

Contact us to find out more about our free auditing programmes.

Dedicated to Be the Difference®

Because of what we do every day, someone's Mother, Brother, Father, Son, Sister, Aunt, Uncle, Child or Lover won't get sick, die or suffer.

250,000,000 people helped by PDI products every year.

Together, we'll make all the difference in the world.
