

Ready-to-use skin disinfection biocide solutions containing Chlorhexidine gluconate (CHG) at 2% w/w and Isopropyl alcohol (IPA) at 70% v/v, providing long-lasting microbial kill of up to 48 hours.

In the UK, these products are not licensed medicinal products, and they are not intended for pre surgical skin antisepsis. These products are PT1 Skin Biocide products, intended for skin disinfection only.

Ideal to use for:

+ Larger areas of skin that require disinfection.

+ Proven Efficacy

Based on its active ingredients, a broad spectrum of efficacy is guaranteed against bacterial, yeasticidal & virucidal activity.

+ Easy to Use

The product comes with an easy-to-use applicator nozzle for accurate application. Also available with screw top.

+ Increase Skin Hydration

Contains glycerin which helps to relieve dryness and refresh the skins surface.

+ Convenient to Use

Ready to use, requiring no activation.
