

2% CHG Swab

2% CHG
SWAB

The single-use skin swab is a ready to use, pre-saturated swab containing 2% (w/w) Chlorhexidine gluconate and 70% (v/v) Isopropyl alcohol.

In the UK, these products are not licensed medicinal products, and they are not intended for pre surgical skin antiseptis. These products are PT1 Skin Biocide products, intended for skin disinfection only.

Ideal to use for:

- + Skin Disinfection using 2% Chlorhexidine gluconate (CHG) and 70% Isopropyl alcohol (IPA).
- + Small areas of skin that require disinfection.

+ Proven Efficacy

A broad spectrum of efficacy guaranteed against bacterial, yeasticidal & virucidal activity.

+ Moisture retention

Airtight poly-lined foil sachet to minimise the risk of the swab drying.

+ Convenient to use

Individually wrapped single-use swabs with easy tearing.

+ Made in the UK

Guaranteed supply and supporting carbon net-zero initiatives.

The applicators 2% CHG and 70% IPA formulation is recommended in evidence-based infection guidelines published by health organisations such as NICE¹, epic³² and the World Health Organization³.

Recommended skin swab based on general skin coverage:

SKIN SWAB SIZE	RECOMMENDED SKIN COVERAGE
