

The single-use swabstick is a ready to use device containing 2% (w/w) Chlorhexidine gluconate and 70% (v/v) Isopropyl alcohol requiring no activation.

In the UK, these products are not licensed medicinal products, and they are not intended for pre surgical skin antisepsis. These products are PT1 Skin Biocide products, intended for skin disinfection only.

### Ideal to use for:

- + Skin Disinfection using 2% Chlorhexidine gluconate (CHG) and 70% Isopropyl alcohol (IPA).
- + Interdigital use and within skin folds.

### + Proven Efficacy

Based on its active ingredients, a broad spectrum of efficacy is guaranteed against bacterial, yeastical & virucidal activity.

### + Convenient to Use

Ready to use, requiring no activation.

### + Time saving

Easy to open with no sharp glass to break.

### + Excellent User Experience

The unique 2-sided swab is ideal for disinfecting skin in harder-to-reach places such as interdigital areas and skin folds.

### + Recommended Skin Coverage

10cm x 10cm
