

Let's Magnify...Influenza!

⊕ Seasonal influenza (flu) is an acute respiratory infection caused by influenza viruses.

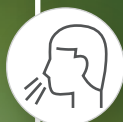

⊕ Pathogen type: Enveloped Virus

Did you know?

There are a billion cases of seasonal influenza a year including 3-5 million cases of severe illnesses.

How it is Spread

Infectious droplets dispersed into the air via coughing or sneezing.

Touching surfaces that have been contaminated.

Close proximity to someone who is infected.

Symptoms

Fever

Dry cough

Sore throat

Body aches

Fatigue

Prevention Strategies

- ✓ Rest and drink plenty of fluids.
- ✓ Practice good hand hygiene.
- ✓ Cover your mouth and nose with a tissue when you cough or sneeze.
- ✓ Clean and disinfect surfaces regularly – the virus can survive for 24hrs on hard surfaces.
